Individually:

Brandon Ngo:

1. Use your map to write scenarios and user's stories.

    Yen is a senior at UNC Charlotte and the president of "Vietnamese Student Association" (VSA). She is tech-savvy and usually organizes events promoting cultural understanding. She wants to attract more members and advertise all upcoming events.

    Yen finds a website that is built by UNCC students (Brandon Ngo, Long Nguyen, and Thanh Nguyen). She logs into the website with her club account. She navigates to the event creation section and she can input details about the "Taste of Vietnam" festival happening next month. The platform allows her to select the festival's themes (i.e. food, music, art). She uploads the event poster and sets it as a "featured event" on the homepage. She can also invite members of other clubs, such as the "Korean American Student Association," to collaborate on the event by sending them a direct message or email.

2. From your scenario and user's stories, develop your features.

    a) Create and promote an event

    b) Collaborate with other student organizations

    c) Feature the event on the homepage

Long Nguyen:

1. Use your map to write scenarios and user's stories.

    John is a freshman at UNC Charlotte and interested in exploring cultural clubs on campus. He is unfamiliar with the many cultural organizations available at his university.

    John finds a website that is built by UNCC students (Brandon Ngo, Long Nguyen, and Thanh Nguyen). He logs onto the platform, creates the account, then inputs his preferences for cultural exploration and social activities. The platform shows a list of clubs and organizations with detailed descriptions, including event dates, missions, and how to join. He notices the "Vietnamese Student Association" listed with their respective upcoming events. As he is interested, he clicks on the club names to view details on meeting times, membership options, and past events. He also uses the "Join Now" button to receive membership information via email.

2. From your scenario and user's stories, develop your features.

a) A search function that filters student organizations based on categories like culture, interests, and activities.

b) User account setup with customizable preferences for personalized content.

Thanh Nguyen:

1. Use your map to write scenarios and user's stories.

   Linh is a sophomore at UNC Charlotte and interested in cultural exchange but unable to attend many in-person events due to busy schedules.

   She finds a website that is built by UNCC students (Brandon Ngo, Long Nguyen, and Thanh Nguyen). She discovers a "Virtual Cultural Exchange" feature on the platform. She decides to join a session hosted by the "Vietnamese Student Association" that showcases different traditions through live video and discussion. She can participate by asking questions and connecting with students in real time. After the session, she is prompted to join the organization or receive notifications about future in-person or virtual events.

2. From your scenario and user's stories, develop your features.

   a) Virtual event integration with real-time participation through video or chat.

   b) Sign up for notifications on future virtual events.

Group:

1. Look at your group members' scenarios and stories, generate a feature list.

   a) A search function that filters student organizations based on categories like culture, interests, and activities.

   b) User account setup with customizable preferences for personalized content.

   c) Virtual event integration with real-time participation through video or chat.

   d) Sign up for notifications on future virtual events.

   e) Create and promote an event. Feature the event on the homepage.

   f) Collaborate with other student organizations.
